Education

De La Salle University — Manila, Metro Manila
BS Computer Science, major in Network Information Security · CGPA: 3.299 — *Expected Sep. 2028*

Experience

Associate Backend Engineer — Oct. 2024 – Sep. 2026
La Salle Computer Society — *DLSU*

- Contributed to the development of a university-wide website by assisting in backend API implementation and database design.
- Prepared digital materials and presentations for an organisation-wide event.

Projects

Resole | *Next.js, React Native, TypeScript, Tailwind, Supabase, PostgreSQL* — Aug. 2026

- Built a full-stack P2P commerce marketplace for premium sneakers with an edge deployed computer vision model (YOLOv8n, TFLite) and Gemini 3.1 Flash for automated price suggestions based on sneaker condition and market trends.
- Developed a scalable backend using PostgreSQL and Drizzle ORM on Supabase, featuring automated data scraping via Puppeteer.

Vibe-Coded Website Fuzzer | *Python* — July 2026

- Built a DAST fuzzer in Python to automate vulnerability discovery (IDOR, JWT bypasses, and rate-limiting flaws) in AI-generated web applications.
- Integrated a native CVSS v3.1 scoring engine to evaluate findings and generate comprehensive, styled vulnerability risk reports.

Leap 2025 Registration System | *Express.js, Typescript, Redis, Kubernetes* — May 2025

- Built a high-traffic event registration platform engineered for reliability under extreme concurrency.
- At it's peak, the system supported 30,000+ concurrent users, 302 hosted events, and 99.9% uptime.

Listening | *React, Typescript* — Aug. 2026

- An elegant now-playing display for Last.fm showing song info, and integrating with OpenWeatherMap and Spotify APIs.

Suanpan | *Python, FastAPI, Valkey* — Sep. 2026

- A stateless counting API with namespace based counters. Primarily privacy and performance driven, offering basic analytics without unnecessary complexity overhead.
